Spacer for adjustment

TS series (100pcs/pack)

- When using OQ-43, HQ-3, MK series, etc. to mount PC boards by two-tiered installation, the constant height is maintained by fitting one spacer of this type respectively on the both sides and at the center. (TS-10 series)
- This can be also used to raise an electronic part or maintain a constant height.
- Various usages are available.
- Material: Fluorine resin (UL VW-1) black
- Heat resistance: Dip, manual soldering or reflow can be carried out.
- Operating temperature range: 40 to + 240℃
