

Test point for surface mounting (3.2 × 1.6 type)

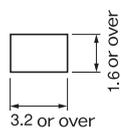

HK-1 series

- This is a test point for a PC board surface mounting.
- With the same size as the chip fixed resistor of 3216 type, the pattern design is easy.
- An oscilloscope probe can be easily hooked in the upper hole.
- This can be also used for pattern heat dissipation.
- Material: Brass
- Finish HK-1-G: Gold plating over nickel base
HK-1-S: Tin plating over nickel base

Part No.	Package
HK-1-G	Bulk (1000pcs/pack)
HK-1-S	Bulk (1000pcs/pack)
