

For design mistake check

OK series (1000pcs/pack)

- This product can be inserted with an IC leg, and wiring of electric wire can be carried out through this product.
- Please use this product also for check.

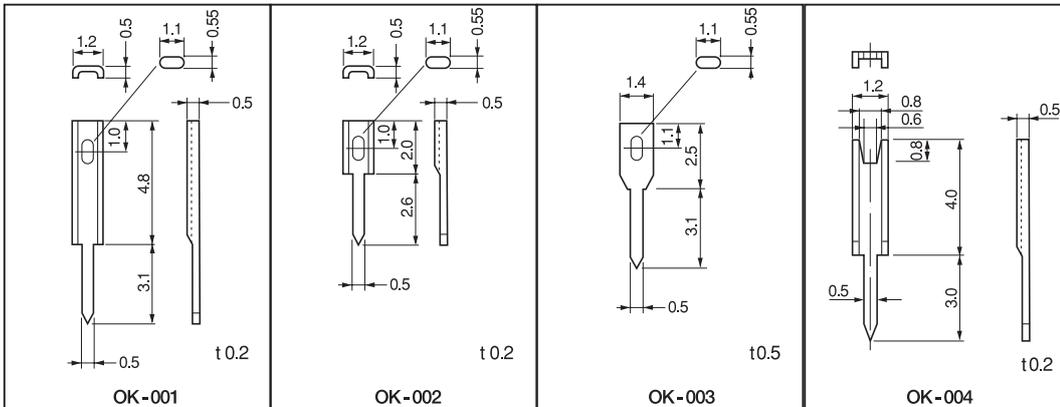

■ **Specification**

- Material : Phosphor bronze : t0.2, t0.5
- Finish G : Gold plating over nickel base
S : Tin plating over nickel base
- Printed board fitting hole diameter : ϕ 0.8
- Adaptive electric wire diameter : ϕ 0.5 or smaller
(Can accommodate 2 lines.)

Part No.	Usage
OK-001-G	For part wiring (Insert with the IC leg.) For signal line check
OK-001-S	
OK-002-G	For wiring on the soldering surface (Insert with the IC leg. Cut the IC leg to prevent it from covering the terminal hole.) For line check on the soldering side
OK-002-S	
OK-003-G	For upper and lower electric connection through hole wiring For signal line check
OK-003-S	
OK-004-G	For adjusting the part (resistor, capacitor, etc.) (Insert with the IC leg.)
OK-004-S
