

## Jumper for high current

### JPW series (100pcs/pack)

- High current can be applied to this jumper.
- This is used for applying high current to a thick opper board, etc.
- This can be used as a jumper on the one-sided board and for short circuit.
- As this can be set above a PC board, there is no problem for the pattern passing through below the jumper.
- Material: Copper (  $\phi$  3.0)
- Finish: Tin plating over nickel base
- Rated current: 40A
- Printed board fitting hole diameter :  $\phi$  3.2
