

Non-magnetic Spring probe

Part No.: **VPP series** (1pcs/pack)

- Spring probe with non-magnetic material.
- Due to non-magnetism, it's suitable for test socket, probing card which is used for the inspection of magnetic sensor, hall effect IC etc.
- This pin is pulled in/out by a spring.
- This is used for checking PC boards, checking after mounting, etc.
- Electrical specifications Rated current : 0.3A
- Material and surface finish
 - Edge part: Beryllium copper (gold plating)
 - Case part: Phosphor bronze, (gold plating)
 - Spring part: Beryllium copper (gold plating) (VPP-1-1)
 - Cobalt base alloy (VPP-1-2)
- Operating temperature range: - 40 to + 125°C
- Spring pressure (with 0.7mm stroke)
 - VPP-1-1 : 20g
 - VPP-1-2 : 10g

* Please note that this is subject to change for improving the quality.
